

# PIECES OF THE PUZZLE

## Volume 3—The Afterlife and Infinite Beyond

by

Trinda Latherow

Serious thinkers realize that as human beings, we only have *pieces of the puzzle* to our existence, but as spiritual beings, we have an inner knowing that life *is* continuous and that the spirit of man lives on in an *afterlife and infinite beyond*.

Our existence is not finite. When this life comes to an end, it is only the body that is discarded, the spirit of us or our conscious self returns to whence it came, to an afterlife and infinite beyond. To reincarnate, to move closer to the source of all life, or to do whatever our soul is drawn to do. How splendid is that! From spiritualists to scientists, the consensus among seekers worldwide is that upon death the spirit of us, the part of us that connects to an even greater Spirit, moves from this world into another.

Eternal life is no longer an empty promise or wishful concept, but a truth recognized by all those who have come to know this from their own near-death and spiritual experiences. Children are forming loving relationships with invisible friends. Adults are sensing and acknowledging the presence of Spirit in their lives. Now more than ever before people of all ages and from all walks of life are coming together to discuss alternate realities and beings of light. Humankind *is* realizing its true nature, its true home, and its true purpose.
